2025 Expert

HOFMANN & VRATNY — EXPERTS FOR THE MACHINING OF STEEL & CAST IRON

OUR EXPK1 SERIES

THE RIGHT TOOL. AT ALL TIMES.

Welcome to Hofmann & Vratny. As leading manufacturer of solid carbide tools, we enable companies throughout the world to manufacture their products.

Every day, our strong team works on our collective goal of producing the best tools in the world. Companies from the medical industry, semi-conductor industry, machine and plant construction, aviation, aerospace engineering and, not least, the automotive industry have been using our milling cutters for decades now. Quality – Made in Bavaria.

The success of our company is built on innovation, a culture of cooperation, open interaction with high respect and many years of successful and trustful collaboration with our business partners. You can always count on us, our tools and our irrepressible drive to shape the future of the industry together. To us, that means shaping tomorrow.

PROVEN QUALITY

PROVEN QUALITY

- Manufacturer of solid carbide cutting tools for a wide range of materials
- Founded 1976
- 2 locations in Bavaria and 1 location in Czechia
  - Headquarters with milling cutter production in Aßling near Munich
  - Regrinding center in Nuremberg
  - Location with drill production in Ivančice near Brno

BEHIND THE SCENES

PRODUCTION ENVIRONMENT:
ALWAYS UP TO DATE

On a production area of 3,751m², we produce around 2 million tools per year. In order to guarantee the precise manufacture of our tools, our clean production halls are kept at a constant temperature of 24 °C.

PLANT FOR MACRO TOOLS
- Manufacturing of diameter 8 - 32 mm
- Use of 5 & 6-axis CNC grinding machines with 12-position grinding wheel changer enable us to manufacture complex tool geometries
- Radius tolerance of less than 5 µm
- Laser micrometer with measuring ranges up to 50 mm covers a wide product range

PLANT FOR MICRO TOOLS
- Manufacturing from diameter 0.1 - 6 mm
- Use of 5 & 6-axis CNC grinding machines especially with linear and hydrostatic technology
- Tolerances are 3 µm for concentricity and radii and 5 µm for diameter
- CNC measuring machines for recording and measuring the smallest geometries up to 0.1 mm diameter

PLANT FOR SC DRILLS
- Production of standard and special drills
- Use of 5 & 6-axis grinding machines with steady rest
- Measuring technology for particularly long tools

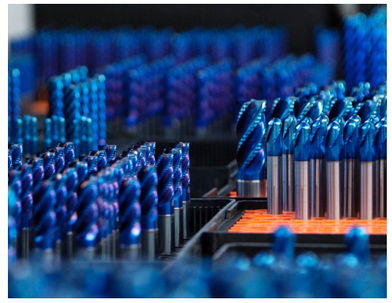
DEPARTMENT FOR SPECIAL TOOLS
- Production of a wide range of semi-standard and special tools
- The delivery times for the special milling cutters are as follows:
  - 3 weeks uncoated
  - 4 weeks coated
  - 6 weeks diamond-coated

REGRINDING CENTRE
- Original reconditioning of Hofmann & Vratny tools
- Regrinding of third-party tools
- The delivery times for reground tools are as follows:
  - without colour coating: 21 calendar days
  - with colour coating: 28 calendar days

RESEARCH & DEVELOPMENT:
THE ORIGIN OF OUR INNOVATIONS

In our R&D department, we develop various milling cutter geometries and work together with our partners on innovative coatings and high-performance substrates. Furthermore, on a total of four CNC milling machines, our milling cutters and those of our competitors are tested here every day in order to develop our tools in the best possible way for state-of-the-art production processes.

WAREHOUSE & LOGISTICS:
SHIPPING TOGETHER



Through our global partner and trading network, we supply the manufacturing industries worldwide and work hand in hand to develop tools that meet customer requirements and market demands. In our warehouse and logistics department, our tools go through a multi-stage process every day to ensure that they reach the customer in perfect condition. With a stock availability of over 98.5 %, we guarantee same-day dispatch for orders received by 3 pm.

PEOPLE ARE THE CENTRE OF ALL OUR ACTIVITIES

Every day, our team makes a significant contribution to the success of our company, which is why it is all the more important to us that our employees feel comfortable and enjoy their work alongside their day-to-day tasks. To contribute to the well-being of our employees, we offer:
- a daily free hot lunch in our canteen
- free hot and cold drinks
- many social benefits

WOULD YOU LIKE TO GET YOUR OWN IMPRESSION OF US?

OUR EXPK1 SERIES

Our experts for the machining of steel & cast iron

OUR EXPK1 SERIES MEETS EVEN THE STRICTEST OF REQUIREMENTS FOR MACHINING STEEL AND CAST IRON

The steel and cast iron material group is a challenging one for milling tools to handle, not least because of the variety of alloys that can be used and all the different properties they have. On the one hand, the tools need to be able to withstand huge amounts of strain, for example due to the high tensile strength of steel (up to 1400 N/mm²) and the unequal structure of cast iron. Yet on the other hand, very soft alloys require geometries that are favourable for cutting in order to ensure that the material can be machined effectively.

The H&V EXPK1 Series has been developed specially with these requirements for cutting steel and cast iron in mind. Our wide range of products guarantees you the perfect tool for machining almost any alloy available on the market today, and can be used with a high degree of process reliability in practically every manufacturing process.

- Designed for extremely high speeds and a long tool life
- Submicron substrate with tried-and-tested hardness and improved fracture toughness for lasting performance in all steel and cast iron alloys
- Geometries designed for high process reliability, tailored to factors such as the complex requirements in the field of toolmaking and mould making

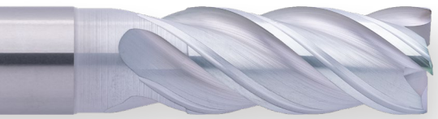
A SPECIAL EDGE PREPARATION PROCESS ENSURES:

- Entirely homogeneous cutting edges
- Even distribution of cutting forces
- Improved surface quality of the component
- Controlled and even wear

DISCOVER OUR EXPK1 SERIES IN ACTION

BEFORE EDGE PREPARATION

AFTER EDGE PREPARATION



EXPERT PK1 PERFORMMAKER (M01) Z4

▶ IN ACTION

Reinforced face with two cutting edges to the center, for reliable ramping and helical immersion

Cutting edge with protection radius for maximum stability

- Designed for maximum tool life when trimming or trochoidal milling and with a full slot up to 1xD
- Use for air-cooled milling to unlock its full performance potential
- Defined geometry for stabilisation at high cutting depths
- Variable helical pitch for smooth running and a soft cut
- Unequal tooth pitch to prevent vibrations
- Adapted chip spaces for safe chip evacuation
- Available in 1.5xD and 2xD
- Available as HA and HB
- With AFPX coating

EXPERT PK1 PERFORMMAKER (M01) Z4

▶ IN ACTION

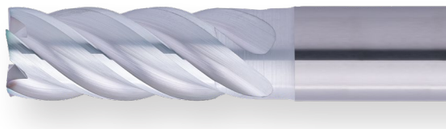
Reinforced face with two cutting edges to the center, for reliable ramping, helical immersion and immersion (drilling) with cooling lubricant up to 1xD

Cutting edge with protection radius for maximum stability

- Designed for maximum machining volume when milling with high radial cutting depths and with a full slot up to 1.5xD
- Use for milling with cooling lubricant to unlock its full performance potential
- Defined geometry for stabilisation at high cutting depths
- Variable helical pitch for smooth running and a soft cut
- Unequal tooth pitch to prevent vibrations
- Larger chip chambers for rinsing with cooling lubricant
- Available in 1.5xD, 2xD and 3xD as well as in 2xD as extra-long version
- Available as HA and HB
- With AFPX coating

EXPERT PK1 PERFORMMAKER (M01) Z5

▶ IN ACTION



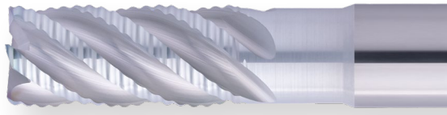
Optimised face for helical immersion and reliable ramping

Cutting edge with protection radius for maximum stability

- Defined cutting edge geometry for stabilisation at high cutting depths
- Special unequal tooth pitch combined with variable helical pitch for optimum smooth running
- Reinforced tool core for high fracture resistance
- Adapted chip spaces for safe chip evacuation
- Available in 2xD
- Available as HA and HB
- With AFPX coating

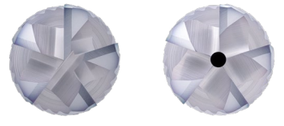
EXPERT PK1 SLOTMAKER (M02) Z5

▶ IN ACTION



Adapted face with corner protection radius for reliable ramping and helical immersion

Available in 2xD and 3xD with and without central internal cooling



- Optimised roughing teeth for a soft cut and small chips
- Slightly conical, reinforced tool core for maximum stability
- Extremely large chip volume and material removal at very high speeds due to extra-large chip chambers and targeted chip evacuation
- Variable helical pitch for smooth running and a soft cut
- Five cutting edges for maximum cutting performance
- Available in 2xD, 3xD and 4xD as well as in 2xD as extra-long version
- Available as HA and HB
- With AFPX coating

EXPERT PK1 CHIPMAKER (M03) Z5

▶ IN ACTION

Reinforced face cutting edge, center-cutting for reliable helical immersion

Corner radii up to R = 2.0 mm available

Radius tolerance is determined by the corner radius
≤ 1.5 mm: ± 0.003 mm
> 1.5 mm: ± 0.005 mm

- Optimised chip breaker design for maximum performance and tool life
- Adapted chip chambers for optimum chip disposal during trochoidal volume machining
- Variable helical pitch combined with special unequal tooth pitch for smooth running and a soft cut
- Available in 2xD, 3xD, 4xD and 5xD
- Available as HA and HB
- With AFPX coating

EXPERT PK1 CHIPMAKER (M03) Z7

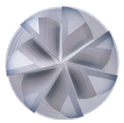
▶ IN ACTION

Seven cutting edges for optimum performance and unparalleled tool life

Corner radii up to R = 2.0 mm available

Radius tolerance is determined by the corner radius
≤ 1.5 mm: ± 0.003 mm
> 1.5 mm: ± 0.005 mm

- Optimised chip breaker design for maximum performance and tool life
- Adapted chip chambers for optimum chip disposal during trochoidal volume machining
- Variable helical pitch combined with special unequal tooth pitch for smooth running and a soft cut
- Available in 2xD, 3xD, 4xD and 5xD
- Available as HA and HB
- With AFPX coating



EXPERT PK1 MIRRORMAKER (M04) Z7

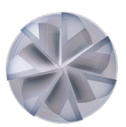
▶ IN ACTION

Face-finish bevel for smooth workpiece surfaces

Corner radii up to R = 2.0 mm available

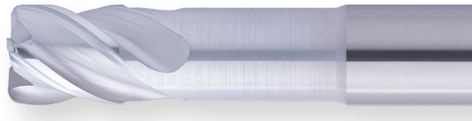
Radius tolerance is determined by the corner radius
≤ 1.5 mm: ± 0.003 mm
> 1.5 mm: ± 0.005 mm

- Seven ultra-smooth cutting edges for top surface quality
- Conically adapted for maximum dimensional accuracy along the entire length of the cutting edge
- Special groove profile for safe disposal of fine chips
- Variable helical pitch and balancing for the smoothest running possible
- Available in 3xD, 4xD and 5xD
- Available as HA
- With AFPX coating



EXPERT PK1 FORMMAKER (M06) Z4

▶ IN ACTION



Adapted face for reliable ramping and helical immersion

Corner radii up to R = 4.0 mm available for contour milling

Radius tolerance is determined by the corner radius
≤ 1.5 mm = ± 0.003 mm
> 1.5 mm = ± 0.005 mm

- Defined geometry for stabilisation at high cutting depths
- Variable helical pitch for smooth running and a soft cut
- Unequal tooth pitch to prevent vibrations
- Adapted chip chambers for safe chip evacuation
- Available in 2xD as HA and HB as well as in 1xD as HA in normal and long versions
- With AFPX coating

EXPERT PK1 FORMMAKER
(M06) Z5

One cutting edge cutting to the center for finishing and reliable helical immersion

Corner radii up to R = 2.0 mm available for contour milling

Radius tolerance determined by radius
≤ 1.5 mm: ± 0.003 mm
> 1.5 mm: ± 0.005 mm

- Five cutting edges for optimized material removal rate and long tool life
- Defined geometry of the cutting edges for stabilization at high infeeds
- Special unequal tooth pitch coupled with variable helical pitch for smooth running
- Reinforced tool core for high breaking resistance
- Available in 2xD
- Available as HA and HB
- With AFPX coating

EXPERT PK1 BLADEMAKER
(M07) Z2-5

▶ IN ACTION

Extremely soft cut due to defined face cutting edge geometry with tangential transitions

- Perfected for use in the high-speed machining
- Reduced vibrations thanks to positive positioning of cutting edges
- Designed for the highest machining volumes
- Cutting force dissipates vertically into the tool thanks to special configuration of the cutting edges
- Also suitable for circumference cutting
- Available in in 0.5xD in normal and long versions
- Available as HA
- With AFPX coating

EXPERT PK1 ROWMAKER
(M08) Z2

▶ IN ACTION

Adapted wedge angle for homogeneous distribution of cutting forces

Radius tolerance determined by radius
≤ 2 mm = ± 0.003 mm
> 2 mm = ± 0.005 mm

- Designed for air-cooled milling
- Special chip chambers for optimum chip disposal
- Adapted cross-cutting edge increases tool life in tool center
- Available in 1xD in short and long versions
- Available as HA
- With AFPX coating

EXPERT PK1 ROWMAKER
(M08) Z2

Face geometry reinforced for maximum roughing and pre-finishing performance

Radius tolerance determined by radius
≤ 2 mm = ± 0.003 mm
> 2 mm = ± 0.005 mm

- Designed for milling with cooling lubricant
- Specially adapted chip chambers for optimum chip disposal
- Defined microbevel for support and stabilisation
- Adapted cross-cutting edge increases tool life in tool center
- Available in 1xD in normal, long and overlong versions
- Available as HA
- With AFPX coating

EXPERT PK1 ROWMAKER (M08) Z4

Four cutting edges, right up to the center

Reinforced face geometry for maximum roughing and pre-finishing performance

Radius tolerance determined by radius
≤ 2 mm = ± 0.003 mm
> 2 mm = ± 0.005 mm

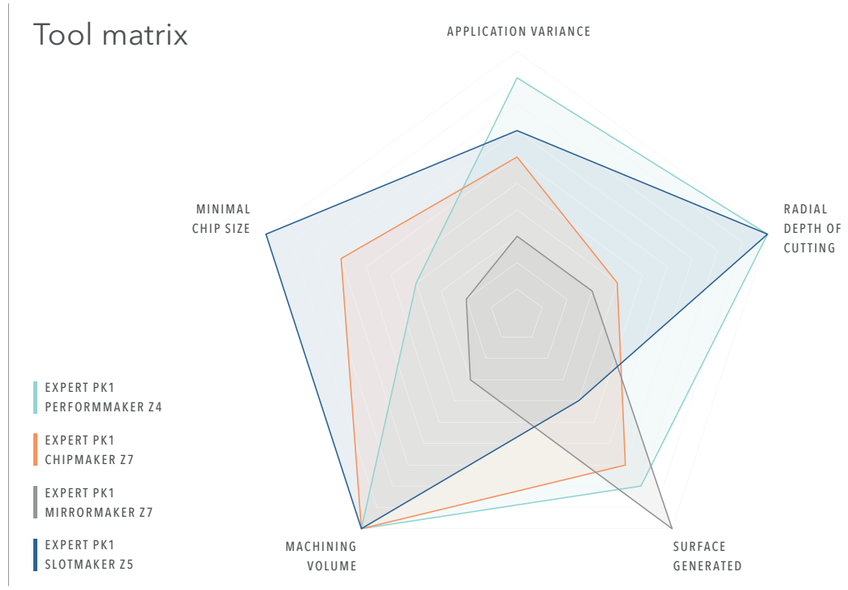
- Low vibrations and smooth running thanks to defined microbevel
- Increased productivity and process reliability thanks to innovative geometry and four cutting edges
- Available in 1.5xD in normal and long versions
- Available as HA
- With AFPX coating

PERFORMANCE COMPARISON

COMPARING THE PERFORMANCE WITHIN THE EXPK1 SERIES

The tool matrix for our EXPK1 Series compares the performance of individual milling cutters within the series. The values clearly show the performance in relation to the respective property in order to help you choose the right tool for every requirement.

Tool matrix



OUR PERFORMMAKER Z4 2XD AFPX (EXPK1-M01-0124) –
DRY MACHINING

COMPARISON WITH THE COMPETITION

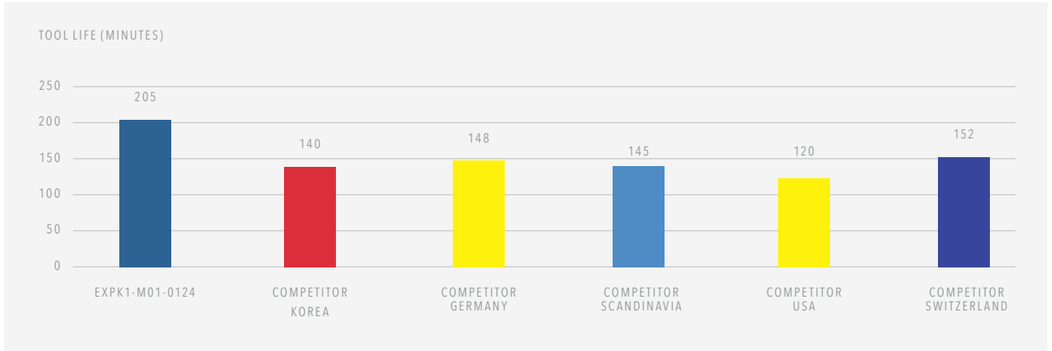
Comparison of tool life when roughing in C45 (1.0503)

During in-house tests carried out at our own research center, our Performmaker came out on top in the comparison with its competitors.

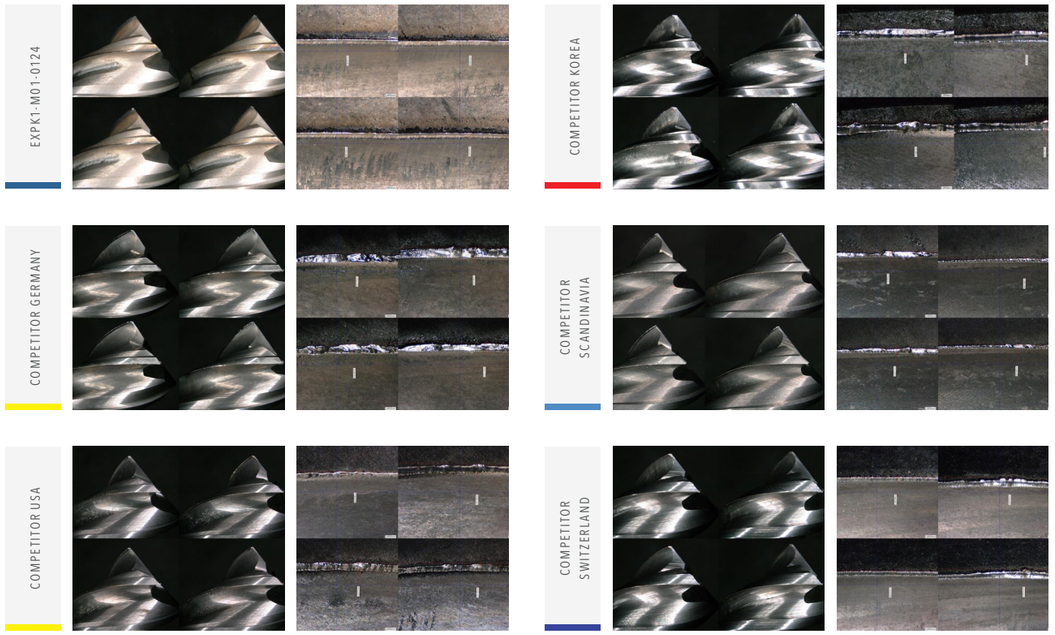
Technical parameters for roughing	
Vc	180 m/min
fz	0.075 mm/Z
ap	18 mm
ae	3.6 mm
Cooling	Air

TOOL LIFE CRITERION = WEAR OF CUTTING EDGE AND BREAKOUTS

End mill Z4 Ø12 2xD	Tool life (min)	Wear on cutting edge mm (average)	Milling behaviour (comment)	Image of chips
EXPK1-M01-0124	205	0.035	Homogeneous milling noise	
Competitor Korea	140	0.133	Inconsistent milling noise	
Competitor Germany	148	0.148	Increased milling noise	
Competitor Scandinavia	145	0.097	Homogeneous milling noise	
Competitor USA	120	0.120	High-pitched milling noise	
Competitor Switzerland	152	0.104	Homogeneous milling noise	



In addition to our EXPK1 Performmaker Z4, these high-resolution photos also show our competitors' tools at the end of their respective service lives. Our Performmaker clearly stands out from our competitors' tools in terms of tool life and wear to its cutting edge.



OUR CHIPMAKER Z5 3XD AFPX (EXPK1-M03-0113) –
DRY MACHINING

COMPARISON WITH THE COMPETITION

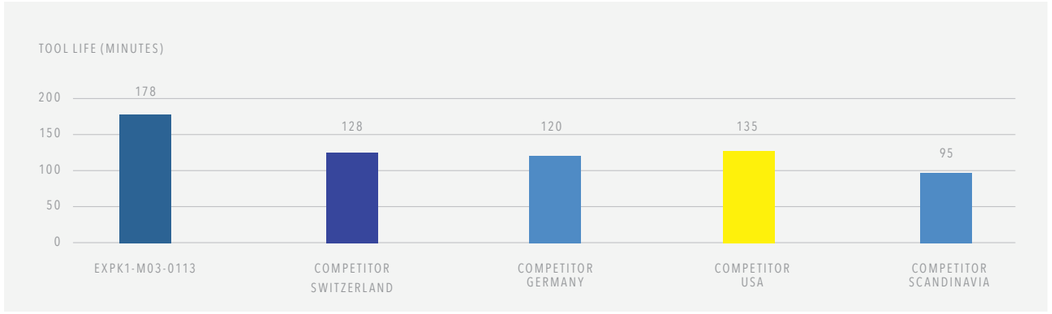
Comparison of tool life when roughing in 42CrMo4+QT (1.7225)

During further in-house testing, our Chipmaker also impressed in trochoidal machining when compared to our competitors' products.

Technical parameters for roughing	
Vc	185 m/min
fz	0.132 mm/Z
ap	36 mm
ae	1.2 mm
Cooling	Air

TOOL LIFE CRITERION = WEAR OF CUTTING EDGE AND BREAKOUTS

Trochoidal milling cutter Z5 Ø12 3xD with chip breakers	Tool life min	Wear on cutting edge mm (average)	Milling behaviour (comment)	Image of chips
EXPK1-M03-0113	178	0.061	Homogeneous milling noise	
Competitor Switzerland	128	0.138	Vibrating milling noise	
Competitor Germany	120	0.147	Homogeneous milling noise	
Competitor USA	135	0.18	Homogeneous milling noise	
Competitor Scandinavia	95	0.164	Increased milling noise	



In addition to our EXPK1 Chipmaker Z5, these high-resolution photos also show our competitors' tools at the end of their respective service lives. Here, we can clearly see that our Chipmaker has not yet reached the limits of its wear, despite having the longest tool life. All of our competitors' tools developed breakouts at various points by the end of their respective service lives – some of them huge.

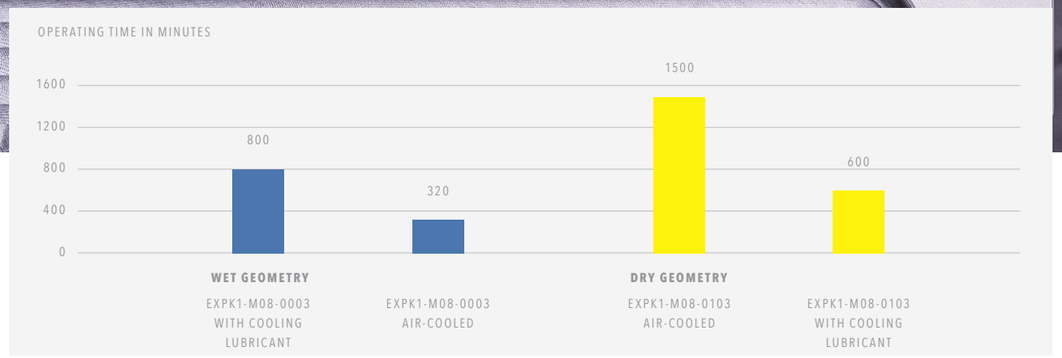
DRY VS. WET MACHINING



Tool life comparison steel machining dry machining (air-cooled) and wet machining (cooling lubricant)

In steel machining, dry machining (if necessary with the support of air cooling) is suitable for process reliable machining in most cases. The tool life of the tools used is increased significantly in the process. In some places, however, the use of cooling lubricant is unavoidable, for example in the case of deep cavities and the associated reliable chip disposal, or to increase the surface quality. That is why for our Performaker Z4 and our Rowmaker Z2 we offer an option specifically for use with full cooling.

Evaluation of our internal test:
The dry variant (EXPK1-M08-0103) and the wet variant (EXPK1-M08-0003) were tested in both application scenarios.
The results speak for themselves, which is why it is imperative to pay attention to the recommended medium (dry machining or wet machining) when choosing tools.

	Cooling	Operating time in min.
EXPK1-M08-0103	air	1500
EXPK1-M08-0103	cooling lubricant	600
EXPK1-M08-0003	cooling lubricant	800
EXPK1-M08-0003	air	320

(MATERIAL UNDER TEST: 1.2379, VC280, FZ0, 18, AE AND AP EACH 0,5 MM - PARAMETERS WERE THE SAME FOR ALL TESTS, ONLY COOLING WAS CHANGED ACCORDINGLY.)

ALPHA FERRO PLATIN X

AFPX

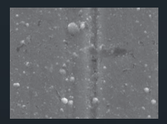
AFPX | High-performance coating specially designed for the requirements of machining steel and cast iron

The standard coatings for machining steel, such as TiAlN coatings, have become so well-established on the market thanks to their characteristically solid properties when used for universal machining.

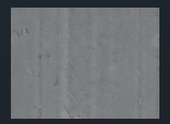
In order to achieve this level of suitability for universal use in all steel and cast iron alloys while improving even further on the performance of the TiSiN-Alpha coating we have been using until now, we have built our new AlphaFerro Platin X based on an all-new AlCrTiN concept. This offers the following advantages over conventional coatings for machining steel and cast iron:

- Greater temperature stability for dry and wet machining
- Longer tool life thanks to improved resistance to wear
- Increased productivity thanks to faster cutting speed

Finishing X as viewed through a scanning electron microscope



BEFORE FINISHING



AFTER FINISHING

HOFMANN & VRATNY | EXPK1 SERIES

NEW

Outstanding layer smoothing – our new Finishing X technique

Finishing X is the name we have given to a special type of layer smoothing used in combination with AlphaFerro Platin that is characterised by unparalleled evenness, more homogeneous wear, and improved wear resistance. It has been developed specially to prevent micro-breakouts caused by droplets coming loose and guarantee a chip disposal process that will remain at its optimum level for a long time. The effects of the symbiosis between our AlphaFerro Platin and the Finishing X technique at a glance:

- Designed for wet and dry machining
- Maximum stability for coating and cutting edges
- Improved surface quality during finishing
- Optimised heat dissipation thanks to improved chip disposal during dry machining
- Absolute smoothness for a reduced friction coefficient (0.4)

ALPHAFERRO PLATIN X AFPX –AT A GLANCE

Structure	Nanostructured multilayer
Components	Aluminium chromium titanium nitride
Layer thickness	3 – 4 µm
Layer hardness	approx. 3500 HV
Adhesion factor	Friction coefficient: approx. 0.4 (dry on steel)
Max. operating temperature	approx. 1100°C
Cooling	Dry and wet machining
Main application	Steel and cast iron
Secondary application (limited suitability)	Stainless steel

Cooling	
Tolerance	e8
Coating	AlphaFerro Platin X

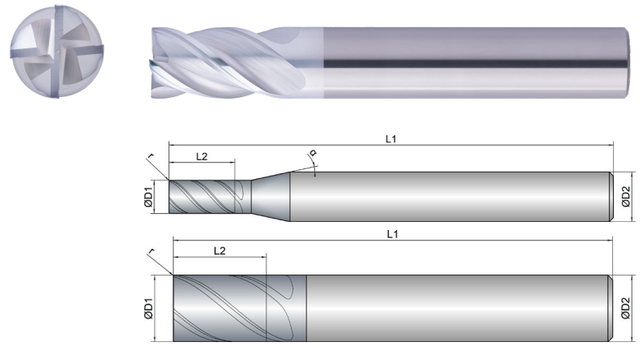
Strategy	ETC, HPC
Application	
Features	HA, ≠, 1,5xD, R

Expert

- Unequal tooth pitch combined with variable helix for smooth running
- Optimized face for process reliable, helical diving and immersion
- Reinforced cutting edge with corner protection radius

- For roughing and finishing, up to 1xD full slot
- Designed for maximum tool life when trimming and trochoidal milling

- Unleashes its full performance potential when milling with air cooling



Roughing

inappropriate — optimal

Finishing

inappropriate — optimal

ADVICE | The values marked in turquoise are side applications!
All fz/a values in the table for material group 1.1, consider factors for the other groups!
When helical and ramping, use fz 50 % of the full slot.
The specified values represent starting values for a solid clamping situation.
To determine the hmax values, please use the provided formula.
For coarser roughing operations and ETC operations, we recommend a Weldon in conjunction with a Weldon chuck.

Features	HB, ≠, 2xD, R

Expert

- Unequal tooth pitch combined with variable helix for smooth running
- Optimized face for process reliable, helical diving and immersion
- Reinforced cutting edge with corner protection radius

- For roughing and finishing, up to 1xD full slot
- Designed for maximum tool life when trimming and trochoidal milling

- Unleashes its full performance potential when milling with air cooling

2.2	austenitic	<750		70	75	128	0.75	0.4
3.1	DUPLEX STEEL | super austenitic	<1100						

ADVICE | The values marked in turquoise are side applications!
All fz/a values in the table for material group 1.1, consider factors for the other groups!
When helical, ramping and drilling use fz 50 % of the full slot.
The specified values represent starting values for a solid clamping situation.
To determine the hmax values, please use the provided formula.
For coarser roughing operations and ETC operations, we recommend a Weldon in conjunction with a Weldon chuck.

STILL CAN'T FIND A SUITABLE MILLING CUTTER?

No problem – simply customize an existing tool. Using our configurator for special milling cutters. you can customize existing tools to your needs in an instant or create your own tools based on predefined types.

WE WILL RESPOND TO ALL REQUESTS SUBMITTED VIA THE CONFIGURATOR WITHIN ONE WORKING DAY AT THE LATEST

EXPK1-M01-0184 | EXPK1 PERFORMMAKER Z4 2XD AFPX

Cooling	
Tolerance	e8
Coating	AlphaFerro Platin X

Strategy	ETC HPC
Application	
Features	HB ≠ 2xD R

Expert

- Unequal tooth pitch combined with variable helical pitch for smooth running
- Reinforced cutting edge with corner protection radius
- Enlarged chip chambers for flushing with cooling lubricant

- Designed for maximum removal rate when milling with high radial depth of cut and in the full slot up to 1.5xD
- For process reliable ramping, helical immersion and diving (drilling) up to 1xD

- Unleashes its full performance potential when milling with cooling lubricant

ADVICE | The values marked in turquoise are side applications!
All fz/a values in the table for material group 1.1, consider factors for the other groups!
When helical, ramping and drilling, use fz 50 % of the full slot.
The specified values represent starting values for a solid clamping situation.
To determine the hmax values, please use the provided formula.
For coarser roughing operations and ETC operations, we recommend a Weldon in conjunction with a Weldon chuck.

Expert

- Unequal tooth pitch combined with variable helical pitch for smooth running
- Reinforced cutting edge with corner protection radius
- Enlarged chip chambers for high chip volume

- Designed for maximum removal rate when milling with high radial depth of cut and in the full slot up to 1xD
- For process reliable helical immersion

Features	HA, ≠, 3xD, R

Expert

- Optimized roughing teeth for soft cut and small chips
- Ascending reinforced tool core for maximum stability
- Variable helical pitch and unequal tooth pitch for smooth running

- For roughing, up to 2xD full slot
- For process reliable, helical immersion

- Extreme material removal at the highest performance
- Also ideally designed for trochoidal milling

Cooling	
Tolerance	e8
Coating	AlphaFerro Platin X

Strategy	ETC, HPC
Application	
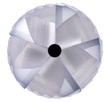
Features	HA, 3xD

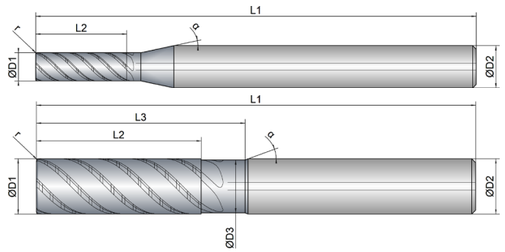
Expert

- Optimized roughing teeth for soft cut and small chips
- Ascending reinforced tool core for maximum stability
- Variable helical pitch and unequal tooth pitch for smooth running

- For roughing, up to 2xD full slot
- For process reliable, helical immersion

- With central inner cooling
- Extreme material removal at the highest performance
- Also ideally designed for trochoidal milling





Roughing

inappropriate — optimal

Finishing

ADVICE | The values marked in turquoise are side applications!
All fz/a values in the table for material group 1.1, consider factors for the other groups!
When helical, ramping and drilling use fz 50 % of the full slot.
The specified values represent starting values for a solid clamping situation.
To determine the hmax values, please use the provided formula.
For coarser roughing operations and ETC operations, we recommend a Weldon in conjunction with a Weldon chuck.

ADVICE | The values marked in turquoise are side applications!
All fz/α values in the table for material group 1.1, consider factors for the other groups!
When helical and ramping, use fz 50 % of the side milling.
The specified values represent starting values for a solid clamping situation.

Expert

- Variable helical pitch with unequal tooth pitch for smooth running and a soft cut
- Adapted chip chambers for trochoidal milling
- Optimized design of the chip breakers for maximum tool life

- For roughing and finishing under ETC conditions
- For process reliable, helical immersion

- Ideal chip evacuation, even with high radial depth of cutting

ADVICE | The values marked in turquoise are side applications!
All fz/a values in the table for material group 1.1, consider factors for the other groups!
When helical, use fz 50 %.
The specified values represent starting values for a solid clamping situation.
To determine the hmax values, please use the provided formula.

STILL CAN'T FIND A SUITABLE MILLING CUTTER?

No problem – simply customize an existing tool. Using our configurator for special milling cutters. you can customize existing tools to your needs in an instant or create your own tools based on predefined types.

WE WILL RESPOND TO ALL REQUESTS SUBMITTED VIA THE CONFIGURATOR WITHIN ONE WORKING DAY AT THE LATEST

Cooling	
Tolerance	e8
Coating	AlphaFerro Platin X

Strategy	HPC
Application	
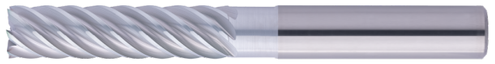
Features	HA, ≠, 4xD, 90°

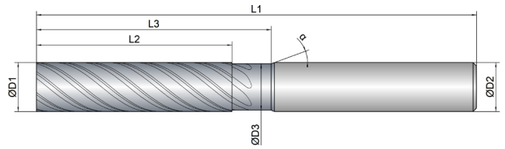
Expert

- 7 finely finished and homogenized cutting edges
- Special groove profile for the removal of long chips
- Variable helical pitch and unequal tooth pitch for maximum smoothness

- For excellent surfaces and maximum dimensional accuracy

- 7 cutting edges for highest feed rates





Roughing

inappropriate — optimal

Finishing

STILL CAN'T FIND A SUITABLE MILLING CUTTER?

No problem – simply customize an existing tool. Using our configurator for special milling cutters. you can customize existing tools to your needs in an instant or create your own tools based on predefined types.

WE WILL RESPOND TO ALL REQUESTS SUBMITTED VIA THE CONFIGURATOR WITHIN ONE WORKING DAY AT THE LATEST

Cooling	
Tolerance	e8
Coating	AlphaFerro Platin X

Strategy	ETC, HSC, HPC
Application	
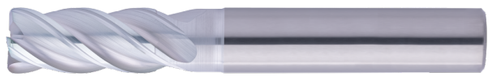
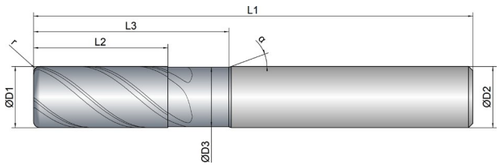
Features	HA, ≠, 2xD, R

Expert

- Unequal tooth pitch and variable helical pitch for smooth running
- Specially designed cutting edge geometry for contour machining
- Optimized chip chambers for safe evacuation of the chips





- For roughing and finishing, up to 1xD full slot
- Multipass milling of 3D contours

- Radius tolerance r ≤ 1.5 mm: ± 0.003 mm
- Radius tolerance r > 1.5 mm: ± 0.005 mm

STILL CAN'T FIND A SUITABLE MILLING CUTTER?

No problem – simply customize an existing tool. Using our configurator for special milling cutters. you can customize existing tools to your needs in an instant or create your own tools based on predefined types.

WE WILL RESPOND TO ALL REQUESTS SUBMITTED VIA THE CONFIGURATOR WITHIN ONE WORKING DAY AT THE LATEST

Cooling	
Tolerance	e8
Coating	AlphaFerro Platin X

Strategy	ETC, HSC, HPC
Application	
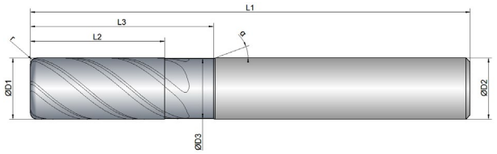
Features	HA, ≠, 2xD, R

Expert

- Five cutting edges for an optimized metal removal rate and extended tool life
- Defined geometry of the cutting edges for stabilization with high cutting depths

- For multipass milling of 3D contours



- Radius tolerance r ≤ 1.5 mm: ± 0.003 mm
- Radius tolerance r > 1.5 mm: ± 0.005 mm

Roughing

inappropriate — optimal

Finishing

ADVICE | The values marked in turquoise are side applications!
All fz/α values in the table for material group 1.1, consider factors for the other groups!
When helical and ramping, use fz 30 % of side milling.
The specified values represent starting values for a solid clamping situation.
To determine the hmax values, please use the provided formula.
For coarser roughing operations and ETC operations, we recommend a Weldon in conjunction with a Weldon chuck.

Expert

- Optimized cross cutting edge for minimal face wear
- Innovative shape of the chip chamber for effective chip evacuation
- Defined microbevel for support and stabilization

- For use in HSC milling
- For roughing and finishing
- Long version for deeper cavities

- Designed for use with cooling lubricant
- Radius tolerance r ≤ 2 mm: ± 0.003 mm
- Radius tolerance r > 2 mm: ± 0.005 mm

Cooling	
Tolerance	f8
Coating	AlphaFerro Platin X

Strategy	HSC
Application	
Features	HA, 1xD, R

Expert

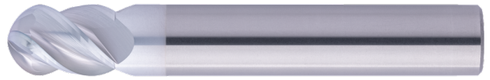
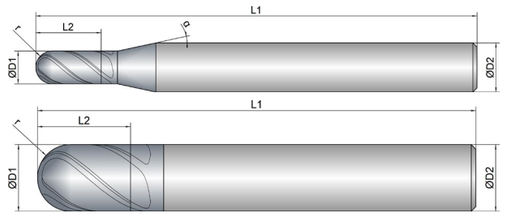
- Highest surface quality through 4 cutting edges to the center
- Defined tool flank for support and vibration reduction
- Special face geometry for optimal chip evacuation



- For use in HSC milling
- For roughing and finishing



- 4 cutting edges for the highest feed speeds
- Radius tolerance r ≤ 2 mm: ± 0.003 mm
- Radius tolerance r > 2 mm: ± 0.005 mm

EXPLANATION

APPLICATIONS

Multipass milling	Trimming	Deburring	Engraving
Corner rounding	Full slot milling	Forward and backward deburring	

COOLINGS

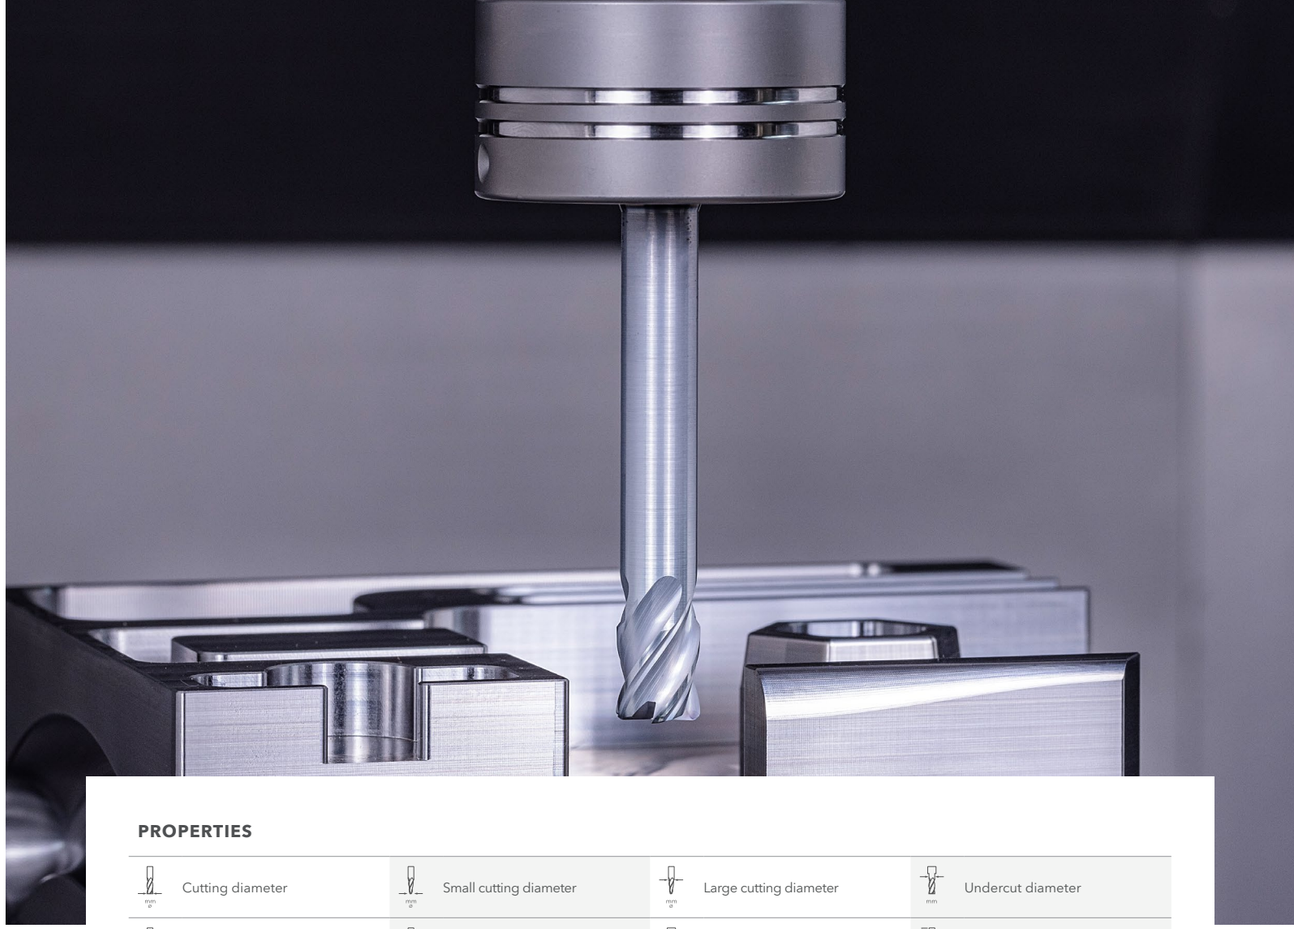
Air-cooling	Dry machining	Oil cooling	Cooling Lubricant
Minimum quantity lubrication			

FEATURES

0,5xD	1xD	1,5xD	2xD
2,5xD	3xD	3,5xD	4xD
5xD	Center cutting	Non-center cutting	Without Weldon
With Weldon	Internal cooling	Dynamic helical pitch	Chip breaker
Unequal tooth pitch	Roughing teeth	Helical immersion	Feed directions x,y
Feed directions x, y, z	Feed directions x, y, (z)	Corner radius	Corner bevel
Sharp edged			

STRATEGY

Extended Trochoidal Cutting	High Performance Cutting	High Speed Cutting	Multi Task Cutting
Universal Machining			



PROPERTIES

Cutting diameter	Small cutting diameter	Large cutting diameter	Undercut diameter
Cutting length	Total bevel length	Undercut length	Total length
Shank diameter	Number of teeth	Corner radius	Corner bevel
Programming radius	Maximum cutting depth	Helical angle	Alpha angle

APPLICATION TABLE

The values given in the application table are only guidelines. These values are largely dependent on the machining situation and application.

FIGURES

All technical drawings and photographs are given as an example. The product may deviate from the original in terms of colour and dimensions.

Technical formulas

Calculate cutting speed (m/min)	$V_c = \frac{D * \pi * n}{1000}$
Calculate rotational speed (rpm)	$n = \frac{V_c * 1000}{D * \pi}$
Calculate feed rate (mm/min)	$V_f = n * z * f_z$
Calculate feed per tooth (mm/number of teeth)	$f_z = \frac{V_f}{n * z}$
Calculate chip removal rate (cm³/min)	$Q = \frac{a_p * a_e * V_f}{1000}$
Calculate average chip thickness (mm)	$h_m = f_z * \frac{\sqrt{a_e}}{D}$

Explanation of terms

Vc	Cutting speed	in m/min
n	Rotational speed	in rpm
Vf	Feed rate	in mm/min
Fz	Feed per tooth	in mm/number of teeth
z	Number of teeth (cutting)	
ap	Depth of cut	in mm
ae	Width of cut	in mm
hm	Average chip thickness	in mm
Q	Chip removal rate	in cm³/min
D	Diameter of tool	in mm

GENERAL TERMS OF SALE

§ 1 SCOPE

1. These General Terms of Sale apply to all business relationships between Hofmann & Vratny OHG (hereinafter referred to as “Hofmann & Vratny”) and its customers (hereinafter referred to individually as the “Ordering Party” and collectively as the “Ordering Parties”).

2. These General Terms of Sale only apply to Ordering Parties that are entrepreneurs pursuant to §§ 14 and 310 para. 1 of the BGB (Civil Code of Germany). legal entities under public law. and/or special funds under public law.

3. The scope of application of these General Terms of Sale includes. but is not limited to. contracts regarding the sale and/or delivery of chattels (hereinafter referred to as “Goods”) regardless of whether they are produced by Hofmann & Vratny or procured from suppliers (§§ 433 and 651 of the BGB). Unless agreed upon otherwise. the version of these General Terms of Sale applicable at the time the Ordering Party places an order and in any case the most recent version of these General Terms of Sale provided to the Ordering Party in writing in the form of a master agreement also shall apply to similar contracts made at a later date without Hofmann & Vratny being required to make reference to them in every individual case.

4. These General Terms of Sale shall apply exclusively. These General Terms of Sale also shall apply if and when Hofmann & Vratny executes a delivery without reservation despite having knowledge of the Ordering Party's terms of sale which contradict or deviate from these General Terms of Sale. Any of the Ordering Party's terms of sale which contradict or deviate from these General Terms of Sale shall become part of a contract only with Hofmann & Vratny's express prior consent. Such requirement to consent shall apply in any case even. for example. if the Ordering Party refers to its terms of sale as part of an order placement and Hofmann & Vratny does not object explicitly to such terms.

5. If Hofmann & Vratny and the Ordering Party have entered into any individual agreements. such individual agreements shall prevail over these General Terms of Sale. The content of such individual agreements only can be substantiated by a written contract or by written confirmation from Hofmann & Vratny. Individual agreements (e.g.. outline delivery contracts. quality assurance agreements) and information provided in Hofmann & Vratny's order confirmation shall prevail over these General Terms of Sale. In case of doubt. commercial clauses shall be interpreted based on the Incoterms® issued by the International Chamber of Commerce in Paris (ICC) and applicable at the time the contract is entered into.

6. All of the Ordering Party's legal declarations and notifications made with regard to the contract (e.g.. in connection with deadlines or notices of defects. rescission. or reduction) shall be made in writing to be effective. In the context of these General Terms of Sale. in writing shall include written and text forms (e.g.. letters. e-mails. faxes). Legal requirements regarding form and other verifications including. but not limited to. cases of doubt regarding the legitimation of the notifying party shall remain unaffected.

7. All references to applicable laws shall be for the purpose of clarification only. Unless amended in or excluded expressly from these General Terms of Sale. laws shall apply even without express reference.

§ 2 OFFERS AND ACCEPTANCE

1. All offers made by Hofmann & Vratny shall be subject to change and shall be non-binding including if and when images. drawings. technical documentation. calculations. analyses. other documents or product descriptions of whatever nature (hereinafter referred to as “Documents”) are provided to the Ordering Party if the proprietary rights and copyrights to those Documents are retained by Hofmann & Vratny.

2. All orders for Goods placed by the Ordering Party shall constitute binding offers. Unless stated otherwise in the respective order. Hofmann & Vratny shall be entitled to accept an offer within two weeks after receipt of said offer.

3. Hofmann & Vratny shall accept offers in writing (e.g.. in the form of an order confirmation) or by delivering the respective Goods to the Ordering Party.

4. All proprietary rights and copyrights to Documents shall remain with Hofmann & Vratny. Documents marked as confidential shall be forwarded to third parties only with the express written consent of Hofmann & Vratny.

§ 3 DELIVERY DEADLINES AND DEFAULT OF DELIVERY

1. Delivery deadlines shall be agreed upon by Hofmann & Vratny and the individual Ordering Party or shall be specified by Hofmann & Vratny upon acceptance of the order or in the order confirmation.

2. Hofmann & Vratny's compliance with delivery obligations shall be conditional upon the Ordering Party's on-time and proper compliance with the Ordering Party's obligations including. but not limited to. the provision of the papers. permits and approvals required to be provided by the Ordering Party and the receipt by Hofmann & Vratny of the agreed-upon down payment. if any. In the event of delays. the delivery time shall be extended reasonably.

3. If Hofmann & Vratny is unable to meet any binding delivery deadlines for reasons beyond the control of Hofmann & Vratny (non-availability of services). the Ordering Party shall be notified without undue delay and shall be provided with an estimated new delivery deadline. If the agreed upon Goods do not become available before the new deadline expires. Hofmann & Vratny shall be entitled to rescind the contract in whole or in part and shall reimburse the Ordering Party without undue delay for any and all consideration paid up to that time. For the fulfillment of this clause. non-availability of services shall include. but shall not be limited to. delayed delivery from any of Hofmann & Vratny's suppliers for reasons beyond the control of Hofmann & Vratny or its suppliers. or if Hofmann & Vratny is not responsible for procuring the Goods.

4. If failure to comply with a delivery deadline is due to an act of God. industrial dispute or other event beyond the control of Hofmann & Vratny. the delivery time shall be extended reasonably. The same shall apply if and when any such act of God. industrial dispute or other event has arisen at any of Hofmann & Vratny's sub-suppliers which event can be demonstrated to have had an impact on compliance with the delivery deadline. Hofmann & Vratny shall notify the Ordering Party of such circumstances without undue delay. Events also shall be deemed to be beyond Hofmann & Vratny's control if and when they occur during a delay. In this case. the delay shall be deemed to be suspended for the duration of the respective event.

5. The beginning of a period of delivery default shall be in accordance with the law. but shall in any case require a reminder issued by the Ordering Party.

6.If a contract regarding stand-by delivery has been signed. Hofmann & Vratny shall deliver and invoice the Goods no later than 12 months after the date of such contract (hereinafter referred to as the “Recall Period”). even if the Ordering Party has failed to recall the Goods by that time. After the Recall Period has expired. Hofmann & Vratny can notify the Ordering Party of Hofmann & Vratny's readiness to deliver and can request that the Ordering Party recall the Goods within a reasonable period of time. If the Ordering Party fails to recall the Goods within such period. Hofmann & Vratny shall be entitled to demand an additional lumpsum compensation for warehousing costs (hereinafter referred to as the “Warehousing Allowance”). The Warehousing Allowance shall be 0.5% of the net value of the purchased Goods for every full week. but shall not exceed 5% of the net value of the purchased Goods in total. The Ordering Party shall be free to prove that Hofmann & Vratny did not incur any damages or that any damages incurred were lower than the Warehousing Allowance. If the Ordering Party fails to recall the Goods within the Recall Period determined by Hofmann & Vratny. Hofmann & Vratny shall be entitled to dispose of the Goods as Hofmann & Vratny sees fit. The statutory provisions regarding rescission shall remain unaffected.

§ 4 DELIVERY AND DEFAULT OF ACCEPTANCE

1. Unless agreed upon otherwise. all deliveries shall be ex works. that is. the place of performance for deliveries and for all subsequent actions. Unless agreed upon otherwise. upon request and at the expense of the Ordering Party the Goods shall be delivered to another destination (hereinafter referred to as “Sales Involving the Carriage of Goods”). Unless agreed upon otherwise. Hofmann & Vratny shall be entitled to determine the shipment method (including. but not limited to. the forwarder. the type of shipment and the packaging).

2. Partial deliveries shall be admissible. provided the Ordering Party reasonably can be expected to accept them.

3. Delivered Goods shall be accepted by the Ordering Party even if the delivered Goods have minor defects provided the Ordering Party reasonably can be expected to accept such Goods.

4. The risk of accidental destruction and/or deterioration of the Goods shall transfer to the Ordering Party no later than upon surrender of the Goods. In the case of Sales Involving the Carriage of Goods. the risk of accidental destruction and/or deterioration of the Goods and the risk of delay shall transfer to the Ordering Party no later than at the time of delivery of the Goods to the forwarder. carrier. or any other person designated to execute shipment of the Goods. Delivery shall be deemed to have been effected even if the Ordering Party is in default of acceptance.

5. If the Ordering Party is in default of acceptance or fails to cooperate or if delivery is delayed for other reasons for which the Ordering Party is responsible. Hofmann & Vratny shall be entitled to demand reimbursement for the damages incurred in connection therewith including additional expenses (e.g.. warehousing costs).

§ 5 TERMS OF PAYMENT

1. Unless agreed upon otherwise in individual cases. Hofmann & Vratny's prices plus statutory sales tax valid at the time the contract is signed shall apply. The prices indicated in Hofmann & Vratny's catalogs are non-binding and subject to change and/ or correction.

2. Unless agreed upon otherwise. in the case of Sales Involving the Carriage of Goods the Ordering Party shall bear the costs of packaging and transportation ex works and the costs. if any. for transportation insurance if such insurance is requested by the Ordering Party. All customs and other fees. taxes and other public charges also shall be borne by the Ordering Party unless agreed upon otherwise. Ownership of the packaging for transportation and otherwise pursuant to the Verpackungsordnung (Packaging Ordinance of Germany) shall transfer to the Ordering Party and such packaging shall not be returned to Hofmann & Vratny. Pallets shall be exempt from this rule.

3. Unless agreed upon otherwise in the order confirmation. the purchase price plus statutory sales tax shall be due and payable without any deductions within 14 days after the date of invoicing and delivery or acceptance of the Goods. However. Hofmann & Vratny reserves the right to make full or partial deliveries against cash in advance at any time including during an ongoing business relationship. The assertion of such right shall be communicated no later than at the time the order confirmation is issued. The Ordering Party shall be deemed to be in default of payment upon the expiration of the aforementioned payment deadline. The applicable rate of interest on the purchase price of the Goods shall become payable during the default period. The right to assert claims for more substantial compensation shall be reserved. Hofmann & Vratny's right to claim commercial-rate default interest (§ 353 of the HGB) shall remain unaffected.

4. The Ordering Party's rights of set-off and retention shall be limited to the extent the Ordering Party's claim is determined in a court of law or is undisputed. The Ordering Party's rights based on defects in the purchased Goods (see § 7 hereof) shall remain unaffected.

5. After the contract has been signed. if there is evidence that Hofmann & Vratny's claim to the purchase price will be compromised due to lack of performance on the part of the Ordering Party. Hofmann & Vratny shall be entitled to refuse performance pursuant to the applicable laws and. after setting a deadline. if applicable. shall be entitled to rescind the contract. In the case of contracts regarding the production of customized items. Hofmann & Vratny shall be entitled to rescind the contract immediately and the laws regarding the expendability of setting deadlines shall remain unaffected.

§ 6 RETENTION OF TITLE

1. Until all pending and future receivables in connection with the business relationship between Hofmann & Vratny and the Ordering Party are paid in full. Hofmann & Vratny shall retain ownership of the Goods. If the Ordering Party violates the contract including. but not limited to. default of payment. Hofmann & Vratny shall be entitled to rescind the contract pursuant to the applicable laws and to demand the surrender of the Goods.

2. Goods subject to retention of title shall not be pledged or assigned as collateral before the Ordering Party has paid in full. The Ordering Party shall notify Hofmann & Vratny in writing without undue delay in the event of a fling for commencement of insolvency proceedings or if third parties gain access (e.g.. seizures) to Goods belonging to Hofmann & Vratny.

3. If the Ordering Party violates the contract including. but not limited to. by failing to pay the purchase price when due. Hofmann & Vratny shall be entitled to rescind the contract pursuant to the applicable laws and to demand the surrender of the Goods due to the retention of title and the rescission.

4. Until further notice. the Ordering Party shall be entitled to resell/and or process in the ordinary course of business any Goods subject to retention of title. In this case. the provisions below also shall apply.

a) The retention of title shall include title to the full value of work products resulting from processing. mixing or combining the Goods. in which case Hofmann & Vratny shall be deemed to be the manufacturer. If and when third-party goods are processed. mixed or combined and such third parties retain ownership. Hofmann & Vratny shall acquire coownership pro rata of the invoiced value of work products so processed. mixed or combined. In all other cases. the creation of work products shall be subject to the same provisions as the delivered Goods subject to retention of title.

b) The Ordering Party hereby agrees to assign to Hofmann & Vratny as collateral any and all receivables against third parties resulting from the resale of the Goods or work results in full or in the amount of Hofmann & Vratny's estimated share of co-ownership pursuant to a) above. and Hofmann & Vratny hereby accepts such assignment. The Ordering Party's obligations under § 6 2) hereof also shall apply with respect to the receivables assigned.

c) In addition to Hofmann & Vratny. the Ordering Party shall remain authorized to collect receivables. Hofmann & Vratny undertakes to refrain from collecting receivables as long as the Ordering Party meets its payment obligations vis-à-vis Hofmann & Vratny and does not fail to perform and Hofmann & Vratny does not assert its retention of title by asserting a right under § 6 3) hereof. Otherwise. Hofmann & Vratny shall be entitled to demand that the Ordering Party inform Hofmann & Vratny of such receivables assigned and of the names of the debtors. provide Hofmann & Vratny with all the information required for collecting such receivables and the pertinent documents. and inform the debtors (third parties) of the assignment. In addition. in this case Hofmann & Vratny shall be entitled to revoke the Ordering Party's authorization to resell and/or process Goods which are subject to retention of title.

5. Upon request of the Ordering Party. Hofmann & Vratny shall release the collateral to which Hofmann & Vratny is entitled insofar as the realizable value of such collateral exceeds the receivables to be collateralized by more than 10 percent. Hofmann & Vratny shall be free in its decision regarding which collateral to release.

§ 7 LIABILITY FOR DEFECTS AND CLAIMS FOR DEFECTS

1. Unless otherwise agreed upon herein. the Ordering Party's rights based on defects in quality and/or in title (including delivery of the wrong Goods or insufficient amounts. improper assembly/installation. or incomplete instructions) shall be subject to the applicable laws. The special legal stipulations regarding reimbursement of expenses at the time of delivery of newly produced Goods (supplier's recourse as specified in §§ 478. 445a. 445b and §§ 445c. 327 para. 5. 327u of the BGB) shall remain unaffected in any case. unless equal-value compensation has been agreed upon. for example. as part of a quality assurance agreement.

2. Hofmann & Vratny's liability for defects shall be based first and foremost on the respective agreement entered into regarding the quality and the postulated use of the Goods (including fittings and instructions). In this context.

an agreement regarding the quality of Goods shall be any and all product descriptions and manufacturer-provided information outlined in the individual agreement or made publicly known by Hofmann & Vratny (including. but not limited to. in catalogs or on Hofmann & Vratny's internet homepage) at the time the contract was signed. However. if and when no agreement regarding quality has been entered into. the presence or absence of a defect shall be determined based on the legal regulations (§ 434 para. 3 of the BGB). Statements made publicly by the manufacturer or on the manufacturer's behalf including. but not limited to. in advertising materials or on labels on the Goods shall prevail over other third parties' statements. In the case of Goods comprising digital elements or other digital content. Hofmann & Vratny shall be responsible for providing and. if required. updating the digital content only if defined expressly in an agreement regarding the quality of Goods. as stipulated above. Hofmann & Vratny shall not assume any liability for public statements made by the manufacturer or other third parties.

3. Hofmann & Vratny shall not assume liability for any defects of which the Ordering Party is aware. or for any defects of which the Ordering Party is grossly negligent if it is not aware (§ 442 of the BGB) at time the contract is signed. The assertion of claims by the Ordering Party regarding defects shall be conditional upon the Ordering Party's meeting of its statutory duty to inspect and to give notice of defects (§§ 377 and 381 of the HGB (Commercial Code of Germany)). If a defect in the Goods becomes apparent during or after inspection. the Ordering Party shall give written notice to Hofmann & Vratny without undue delay. Regardless of the Ordering Party's duty to inspect and to give notice of defects. the Ordering Party shall give written notice of obvious defects within two weeks after delivery. which notice shall be deemed to have been given in a timely manner if it is transmitted before the end of such period. If the Ordering Party fails to inspect the Goods properly and/or to give proper notice of any defects. Hofmann & Vratny shall not assume liability for any defects for which no notice was given.

4. If any of the Goods are defective. Hofmann & Vratny shall be free to offer supplementary action to remedy the defect or defects (supplementary remedy) or to deliver defect-free Goods (replacement) to the Ordering Party. In individual cases. the Ordering Party may refuse a supplementary action selected by Hofmann & Vratny that the Ordering Party considers to be unreasonable. It is Hofmann & Vratny's right to refuse to offer supplementary action under the applicable laws shall remain unaffected. The requirement for Hofmann & Vratny to provide any supplementary action owed shall be conditional upon the Ordering Party's paying of the purchase price when due. However. the Ordering Party shall be entitled to retain a reasonable portion of the purchase price pro rata in consideration of the defect. The Ordering Party shall give Hofmann & Vratny the time and the opportunity to provide the supplementary action owed including. but not limited to. providing Hofmann & Vratny the opportunity to inspect the Goods which are subject to complaint. If Hofmann & Vratny opts to replace the Goods. at Hofmann & Vratny's request the Ordering Party shall return the defective Goods to Hofmann & Vratny in accordance with the applicable laws; however. the Ordering Party shall not have the right to request to return the defective Goods. Supplementary action shall not include the disassembly. removal. or de-installation of defective Goods nor the assembly. mounting. or installation of defect-free Goods. provided Hofmann & Vratny was not originally obligated to provide such services; any rights the Ordering Party may have to be reimbursed for such costs (hereinafter referred to as “Disassembly and Assembly Costs") shall remain unaffected.

5. If in fact a defect is present. any and all expenses incurred in connection with inspections and supplementary action including. but not limited to. transportation. road. labor and material costs. and Disassembly and Assembly Costs shall be borne by Hofmann & Vratny in accordance with the laws and these General Terms of Sale. However. if the Ordering Party's demand for remedy of a defect is proven to be invalid because the Ordering Party was aware or was grossly negligent if it was not aware that no defect actually was present. Hofmann & Vratny can demand reimbursement from the Ordering Party for any costs incurred therewith. If the costs of supplementary remedy would be disproportionately high. the Ordering Party shall not be entitled to claim remedy of defects.

6. If and when a reasonable deadline for supplementary action set by the buyer has expired unsuccessfully or can be disregarded under the law. the Ordering Party can rescind the purchasing contract in accordance with the law or reduce the purchase price. However. no right to rescind shall apply in the case of insignificant defects.

7. The Ordering Party's claims for damages or reimbursement for wasted expenses shall be limited by the provisions of § 8 below and shall be excluded in all other cases.

8. The statute of limitations for claims for defects in quality and in title shall be one year after delivery of the Goods. The statute of limitations shall commence upon delivery of the Goods provided acceptance has been agreed upon. Other special legal stipulations regarding statutes of limitations (including. but not limited to. § 438 para. 1 no. 1. no. 2. para. 3. §§ 444. 445b of the BGB) shall remain unaffected. The aforementioned statutes of limitations specified in the purchasing laws also shall apply to any contractual and extra-contractual claims for reimbursement made by the Ordering Party based on a defect in the Goods. unless applying the regular statute of limitations stipulated by law (§§ 195. 199 of the BGB) would result in a reduced statute of limitations in individual cases. Any claims for reimbursement the Ordering Party may have pursuant to § 8 para. 2 p. 1 and p. 2 (a) and pursuant to the Produkthaftungsgesetz (Product Liability Act of Germany) shall be subject exclusively to the statutes of limitations stipulated by law.

§ 8 OTHER LIABILITIES

1. Unless agreed upon otherwise in these General Terms of Sale and in the provisions below. Hofmann & Vratny's liability for breach of contractual and non-contractual obligations shall be in accordance with the applicable laws.

2. Hofmann & Vratny's liability for damages. regardless of the legal reasons and of whether or not they are known. as part of Verschuldenshaftung (liability arising from damage caused by negligent act) shall include intent and gross negligence. Subject to the limitations of liability stipulated by law (e.g.. diligence with its own affairs. insignificant breach of duty). in the event of minor negligence Hofmann & Vratny's liability shall be limited to (a) damages resulting from harm to life. body or health and/or (b) damages resulting from the not-insignificant breach of a material contractual obligation. that is. an obligation which must be met to make the proper fulfillment of the contract possible and the meeting of which the Ordering Party relies upon and can rely upon on a regular basis. In this case. however. Hofmann & Vratny's liability shall be limited to reimbursement of the foreseeable damages typical in such cases.

3. The limitation of liability specified above also shall apply vis-à-vis third parties and in the event of a breach of duty by any person (including to his/her own benefit) for which Hofmann & Vratny is responsible by law; however. it shall not apply if and when Hofmann & Vratny is found to have failed to disclose a defect maliciously or has assumed a guarantee for the quality of the Goods and for the Ordering Party's claims under the Produkthaftungsgesetz.

4. The Ordering Party can rescind or cancel a contract due to a breach of obligation other than a breach based on a defect only if and when Hofmann & Vratny is responsible for such breach of obligation. The Ordering Party shall not have an unrestricted right to terminate a contract. All other cases shall be subject to the applicable laws and legal consequences.

§ 9 APPLICABLE LAW AND JURISDICTION

1. These General Terms of Sale and all legal relationships between Hofmann & Vratny and the Ordering Party shall be subject to the laws of the Federal Republic of Germany under exclusion of the provisions of uniform international law. The CISG shall not apply.

2. Any and all disputes arising directly or indirectly from the contractual relationship shall be subject exclusively. including at an international level. to the jurisdiction of Aßling if the Ordering Party is a businessperson as defined in the Handelsgesetzbuch (Commercial Code of Germany). a legal entity under public law. or a special fund under public law. The same shall apply if the Ordering Party is an entrepreneur pursuant to §§ 14 of the BGB. However. in any case Hofmann & Vratny shall be entitled to sue the Ordering Party at the place of performance of the obligation to deliver under these General Terms of Sale and/or under a prevailing individual agreement or at the Ordering Party's general jurisdiction. Prevailing legal regulations including. but not limited to. regarding exclusive jurisdictions. shall remain unaffected.
